For more information, contact the Student Activity Centre (SAC) at least one week prior to the trip. Contact details can be found in your SAC schedule or via the call centre. For the Health, Safety and Welfare requirements for all student trips and participation on guided trips please see the University Health and Safety Policy 2013. A molecular dynamics study of the effect of Cu(II) on the redox properties of the bis(2,2'-bipyridine)ruthenium(II) complex, $[(bpy)_2Ru(CN)_2]^{2+}$. Computational investigations of the chemical and electrochemical properties of the $[(bpy)_2Ru(CN)_2]^{2+}$ complex reveal that aqueous Cu(II) ions interact with the cation and the anion of the ruthenium complex and block the reduction of the complex. Using DFT calculations on a model of the cation/anion pair and a full enzymatic model, we confirm that Cu(II) ions block the reduction of the ruthenium complex. These results are consistent with experimental data that show that complex $[(bpy)_2Ru(CN)_2]^{2+}$ is not reduced by the cytochrome P450 enzyme, cytochrome P450 BM3, even in the presence of Cu(II) ions. Q: Mysql- Error on subselect - LIMIT command I am working on a project in which i am facing an issue with Mysql server. I am using mysql 5.6 and php 5.5 I tried out this query to fetch the data from database: `SELECT 'id' FROM 'products' WHERE 'id'!= (SELECT 'product_id' FROM 'product_cat' WHERE 'category_id'=4) AND 'id'!= (SELECT 'product_id' FROM 'product_tag' WHERE 'tag_id'=0) LIMIT 1`; The result of this query is: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'LIMIT 1' at line 1 I'm unable to find out what's wrong here. Also, The values of "product_id" and "category_id" are auto increment. The complete query which i am using to fetch the data is: `SELECT 'id' , '82157476af`
